		Aluminum 1	100-0
Categories:	Metal; Nonferrous Metal;	Aluminum Alloy; 1000 Series	Aluminum
	This is a common comme	ercial grade sold when "alum	inum" is specified. As with other unalloyed aluminum grades,
Material Notes:	it is used where the intrins	sic formability and corrosion	resistance of aluminum is needed while high strength is not.
	Data points with the AA note have been provided by the Aluminum Association, Inc. and are NOT FOR DESIGN.		
Composition Notes:	The aluminum content for unalloyed aluminum not made by a refining process is the difference		
	between 100.00% and the sum of all other analyzed metallic elements present in amounts of		
	0.010% of more each, expressed to the second decimal before determining the sum. For alloys		
	and unalloyed aluminum not made by refining process, when the specified maximum limit is 0.XX,		
	an observed value or a calculated value greater than 0.005 but less than 0.010% is rounded off		
	and shown as "less than 0.01%".		
Carri N. Carrian	Composition information provided by the Aluminum Association and is not for design.		
Key Words:	Aluminum 1100-O; UNS A91100; ISO AI99.0Cu; NF A45 (France); CSA 990C (Canada); AA1100-O		
Physical Properties	Metric	English	Comments
Density	2.71 g/cc	0.0979 lb. / in ³	AA; Typical
Mechanical Properties	Metric	English	Comments
Hardness, Brinell	23	23	AA: Typical; 500 g. load; 10 mm ball.
Ultimate Tensile Strength	89.6 MPa	13000 psi	AA; Typical
Tensile Yield Strength	34.5 MPa	5000 psi	AA; Typical
	35.00%	35.00%	AA; Typical
Elengation at Brook	@ Thickness 1.59 mm	@ Thickness .0625 mm	
Elongation at Break	45.00%	45.00%	AA; Typical
	@ Diameter 12.7 mm	@ Diameter 0.500 mm	. , , , , , , , , , , , , , , , , , , ,
			AA; Typical: Average of tension and compression.
Modulus of Elasticity	68.9GPa	10000 ksi	Compression modulus is about 2% greater than tensile modulus.
Notched Tensile Strength	90.0 MPa	131000 psi	
•		•	2.5 cm width x 0.16 cm thick side-notched specimen, Kt = 17
Ultimate Bearing Strength	159 MPa	23100 psi	Edge distance/pin diameter = 2.0
Bearing Yield Strngth	55.0 Mpa	7980 psi	Edge distance/pin diameter = 2.0
Poissons Ratio	0.33	0.33	
Fortier Original	34.5 MPa	5000 psi	Consolitation and attended DD Management in a few actions
Fatigue Strength	@# of cycles 5.00e+8	@# of cycles 5.00e+8	Completely reversed stress; RR Moore machine/specimen
Machinability	10.00%	10.00%	0 - 100 Scale of Aluminum Alloys
Shear Modulus	26.0 GPa	3770 ksi	Calculated
Shear Strength	62.1 MPa	9000 psi	AA; Typical
